FOR IMMEDIATE RELEASE

EXTEND YOUR HORIZONS

TRA3000 Immunity Tester now with 5kV EFT pulses

Changes to some product standards have added 5kV Electric Fast Transient (EFT) requirements. An enhanced EFT module with the same physical footprint fits directly into existing TRA3000 mainframes. Extend test capability with on-site upgrade to 5kV EFT. Users can exchange pre-calibrated modules on site to make the most of TRA3000s innovative time and money saving features.

Use the modular technology to make the tester YOU want. Choose from any combination of; ESD, EFT, CWG, AC/DC DIPS, INTERRUPTS and VARIATIONS, COMMON MODE and both AC and IMPULSE MAGNETIC FIELDS.

The most cost effective impulse tester for international basic and product standards, TRA3000 combines Surge voltages up to 4kV with EFT up to 5kV making it the automatic choice for manufacturers and test labs.

Packed with enhanced features TRA3000 is setup simpler and faster with improved test report capability.

Ethernet interface enables control, communication and custom report generation.

Experience TRA3000 at the Electronica in Munich

Stand A1. 464

November 13 to 16:
