**FOR IMMEDIATE RELEASE**

## **TOUCH THE FUTURE**

### **IMU3000 Immunity Tester with 8kV pulses and colour graphics**

New ideas and new technologies are needed to meet the demands of a constantly evolving market. IMU3000 introduces a graphical user interface that every mobile device user will recognise. Easy navigation using a touch panel and rotary knob make IMU3000 the most powerful addition in every EMC laboratory. An Ethernet interface enables control, communication and report generation using the ALL NEW TEMA 3000 software with custom report generator.

Modular architecture enables on-site upgrades saving time and money.

ESD, EFT, CWG, RINGWAVE, 10/700us, AC/DC DIPS, INTERRUPTS and VARIATIONS, COMMON MODE and both AC and IMPULSE MAGNETIC FIELDS.

Surge voltages up to 8kV combine with EFT up to 6kV to make IMU3000 the automatic choice for manufacturers and test labs wishing to cover all international standards.

IMU3000 is packed with new features making setup simpler and faster.

IMU3000 is the future

Experience IMU3000 at the Electronica in Munich

Stand A1. 464

November 13 to 16:
