LINKTECH LAUNCHES UV-RESISTANT “BLACK-OUT” COLOR SERIES

All-New Radiation-Resistant Series Available in Valve, Non-Valved Configurations.

Ventura, CA-April 11, 2016: [LinkTech Quick Couplings Inc.](http://www.linktechcouplings.com) recently launched the New 60PP-Black Series couplings, an advanced all-black coupling made of radiation-resistant material.

The New 60PP-Black Series couplings offer 3/8” flow size and are produced from medical grade, gamma sterilizable, UV-resistant polypropylene. The solid “black-out” color allows users the ability to color key applications, as well as makes these couplings significantly more resistant to UV radiation due to its already advanced raw material capabilities.

Available in both valved and non-valved configurations, these quick disconnect couplings are easy to use with their more robust thumb-latch design. The 60PP-Black Series couplings interconnect with all other 60 Series couplings, as well as other similar industry thumb-latch type high flow couplings. They are manufactured to maintain a long service life in a variety of applications.

Features:

- Larger, more robust thumb-latch
- Highest available flow
- UV-Resistant Polypropylene
- Interconnects with other High Flow Coupling
- Available in 50+ different styles

Benefits:

- Durable, easier and faster to use
- Efficient compact design
- Medical grade gamma sterilizable
- Reverse field compatible
- Unique configurations not offered anywhere else

To learn more information about the 60PP-Black Series coupling technical information, pricing, samples and/or availability, please contact the sales department at 805-339-0055 or email us at csr@linktechcouplings.com. About LinkTech Couplings Inc.

LinkTech provides reliable, high quality, cost effective quick coupling solutions and tubing connectors to customers throughout the world. LinkTech offers a wide range of standard and unique custom couplings designed to address specific customer requirements. Because of our commitment to excellence, LinkTech is rapidly becoming the number one choice for quick couplings.
